SUBCHAPTER 3

SUPPRESSION ACTIVITIES

§8301. Emergencies

Responsibility for control of forest insect and disease outbreaks shall, in all but emergencies, rest with the owners of the property whether private or public. [PL 1979, c. 545, §3 (NEW).]

Emergencies, for the purposes of this chapter, shall be so considered when, in the opinion of the director, the infestation or disease is likely to kill or seriously injure trees in large numbers, or is so localized that immediate control will prevent a large possible outbreak, or is of recent foreign origin. [PL 1987, c. 183, §2 (AMD).]

In emergencies, the director may enter into agreement with municipal officials to pay up to 1/2 the cost of control if state funds are available for this purpose. Whenever the State does contribute funds for this purpose, it shall have the authority to determine the control methods to be used. The State may make similar agreements with groups of private owners if the project is approved by municipal officials. [PL 1979, c. 545, §3 (NEW).]

In an emergency, control measures may be done directly by the State or may be done on a contract basis with responsible private companies or individuals. [PL 1979, c. 545, §3 (NEW).]

§8302. Locally requested control work

Whenever any municipality shall appropriate or raise a sum of money and shall pay the same into the State Treasury for the purpose of controlling, within its borders, a forest insect or disease declared a public nuisance pursuant to section 8303, the director shall cause the amount to be expended in the municipality, together with such sum as may be determined by the director from the state appropriation made therefor. If the director finds it to be unnecessary or impracticable to expend the entire amount or any part thereof during the year following the payment to the Treasurer of State, the unexpended proportion shall be reimbursed to the municipality. Any public agency or group of owners carrying on or planning control measures may appeal to the director for permission to carry out the project in case the owner or owners of property in or adjacent to the control area refuses to do control work or to allow control work to be done on their property. The director may, after careful inspection and survey has shown an emergency exists according to the requirements of section 8301, grant authority for control measures to be carried out on the protestors' lands. - A. The director finds that there exists within the State or in any other state, country or province a plant disease caused by a plant pathogen not native to the State or an infestation of insects not

native to the State that, in the opinion of the director, is likely to kill or seriously injure forest or shade trees in large numbers; and [PL 2001, c. 547, §1 (NEW).]

B. A quarantine to protect against the plant disease or insect infestation has not been established by the Commissioner of Agriculture, Conservation and Forestry or the Secretary of Agriculture of the United States or is not in effect. [PL 2001, c. 547, §1 (NEW); PL 2011, c. 657, Pt. W, §6 (REV).]

(2) Is in proximity to a tree or material that exists within the State and harbors a plant pathogen or insect that is the subject of a quarantine; or

(3) Is transported into the State in violation of a quarantine established by the director, the Commissioner of Agriculture, Conservation and Forestry or the Secretary of Agriculture of the United States. [PL 2013, c. 196, §2 (RPR).]

Rules adopted pursuant to this subsection are routine technical rules as defined in Title 5, chapter 375, subchapter II-A.

[PL 2013, c. 196, §2 (AMD).]

3. Salvage of condemned material. Prior to ordering the destruction of forest or shade trees or parts of forest or shade trees, the director shall consult with the landowner and the person owning stumpage rights to determine if there are methods of destruction that allow recovery of the value or a portion of the value of the condemned material and effectively safeguard the forest resource.

[PL 2019, c. 595, §2 (NEW).]

[PL 2019, c. 595, §2 (NEW).]

3. Economic benefit. If the economic benefit resulting from a violation under subsection 1 exceeds the applicable penalties under subsection 2, the maximum fines may be increased. The maximum fine may not exceed an amount equal to twice the economic benefit resulting from the violation. The court shall consider as economic benefit, without limitation, the costs avoided or the enhanced value accrued at the time of the violation by the violator as a result of not complying with the applicable legal requirements.

[PL 2019, c. 595, §2 (NEW).]

4. Costs permitted. In any action or proceeding brought by the Attorney General under this section, the court may award litigation costs, including court costs, reasonable attorney's fees and reasonable expert witness fees, to be deposited in the General Fund if the State or any of its officers or agencies is a prevailing party in the action or proceeding and the defendant's defense was not substantially justified. 1. Regulation. The Department of Agriculture, Conservation and Forestry shall regulate the presalvage and salvage harvesting of forest stands in areas that, based on the proportion of balsam fir, white spruce, red spruce, black spruce, other softwood and hardwood components present, have significant risk of damage from spruce budworm and are subject to a credible threat of imminent spruce budworm damage.

A. The assessments of risk and vulnerability of a specific forest stand must be supported by adequate data, including but not limited to:

- (1) Forest stand type information; and
- (2) A documented history of recent elevated spruce budworm moth presence or foliage damage from spruce budworm feeding. [PL 2015, c. 314, §12 (NEW).]

B. The director shall designate areas for presalvage and salvage harvesting subject to rules adopted pursuant to subsection 5 no later than January 1st of each year. Areas designated for presalvage and salvage harvesting must be inspected and verified by a licensed forester in the employ of the bureau. The director shall seek public comment for a 30-day period prior to designating such areas. [PL 2015, c. 314, §12 (NEW).]

C. A forest stand that is identified for presalvage and salvage harvesting must be located within the areas designated pursuant to paragraph B. [PL 2015, c. 314, §12 (NEW).]
