Driveways, drains, water pipes and other service pipes or wires located on land on which a natural gas pipeline is constructed shall be left in as good condition as they were prior to the construction, maintenance, repair or reconstruction of the pipeline, except when the natural gas pipeline utility and the owner of the property or right-of-way agree otherwise. [PL 1987, c. 141, Pt. A, §6 (NEW).]

4. Closing right-of-way prohibited. No driveway or right-of-way over the land on which a natural gas pipeline is located may, except during the construction, maintenance, repair or reconstruction of the pipeline, be closed for passage, except by agreement between the natural gas pipeline utility and the owner of the property or right-of-way. [PL 1987, c. 141, Pt. A, §6 (NEW).]

5. Buildings. A building erected by a natural gas pipeline utility shall conform in its method of construction with the building laws or regulations in force in the location in which it is erected, and the exterior design of the building shall conform to the extent possible with the general architectural standards of buildings in the locality. 2. Commission rules and limitation on commission authority. The commission may make necessary rules with respect to the natural gas pipeline utility's pipeline, equipment and manner of operation as they relate to the safety of the public and of the utility's employees, provided that the commission's authority is not inconsistent with or in violation of the Federal Natural Gas Act, as amended, or any rules, orders, regulations or certificates of public convenience and necessity issued under that Act.

[PL 1987, c. 141, Pt. A, §6 (NEW).]

3. Power to effectuate policies of this chapter. 1. Utilities may file for license and permit. When a natural gas pipeline utility, which intends to operate within this State, has filed for either a certificate of public convenience and necessity to be issued under the Federal Natural Gas Act or, in the case of an intrastate gas pipeline company, has filed for the necessary authorization from the commission, that utility may file and process an application for any license, permit or order necessary to obtain all governmental approvals with regard to the location, construction, completion and operation of that pipeline within this State. The effective date of the license, permit, order or governmental approval which is granted or issued may be conditioned upon or suspended until the issuance of the certificate of public convenience and necessity or commission authorization.

[PL 1987, c. 141, Pt. A, §6 (NEW).]

2. Application to Department of Environmental Protection before certificate is issued. If a natural gas pipeline utility applies to the Department of Environmental Protection for any required licenses or approvals before it is issued a certificate of public convenience and necessity under the Federal Natural Gas Act or authorization by the commission, it shall file a bond with the Department of Environmental Protection payable to the department in a form satisfactory to the Commissioner of Environmental Protection. The Commissioner of Environmental Protection shall determine the amount

of the bond which may not exceed \$50,000. The bond shall be conditioned to require the applicant to reimburse the department for its costs incurred in processing any application in the event that the applicant does not receive a certificate of public convenience and necessity as described in this section. [PL 1987, c. 141, Pt. A, §6 (NEW).]

3. Notification of landowners. A natural gas pipeline utility which applies for site location of development approval under Title 38, chapter 3, subchapter I, article 6, shall:

A. Prior to filing a notification under Title 38, section 483, provide notice to each owner of real property upon whose land the applicant proposes to locate a natural gas pipeline by registered mail, postage prepaid at the land owner's last known address as contained in the applicable tax assessor's record; and [PL 1987, c. 141, Pt. A, §6 (NEW).]

B. File, with the town clerk of each municipality through which the pipeline is proposed to be located, a map demonstrating the intended approximate location of the pipeline within the municipality.

The applicant may not be required to provide notice of its intent to construct a natural gas pipeline other than as set forth in this subsection. [PL 1987, c. 141, Pt. A, §6 (NEW).]

§4515. Cease and desist orders

The commission may order a natural gas pipeline utility to cease and desist from operating or acting in violation of a statute or rule or order. Whenever practicable, the commission shall notify a natural gas pipeline utility against whom a cease and desist order is contemplated and afford it an opportunity to present its views and shall afford it reasonable opportunity to comply. Failure to notify and afford such an opportunity does not preclude the granting of appropriate relief. [PL 2003, c. 505, §33 (AMD).]

§4517. Private natural gas pipelines

1. Definitions. As used in this section, unless the context otherwise indicates, the following terms have the following meanings.

A. "Affiliated compression or liquefaction facility" means a facility that is used to liquefy or compress natural gas for sale or distribution to others by means other than a pipeline and that is owned or operated by an affiliate of the owner of a private natural gas pipeline. [PL 2011, c. 592, §1 (NEW).]

B. "Private natural gas pipeline" means a pipeline that is used solely for the transport of natural gas to a single customer and is owned by the customer and whose owner or operator is not otherwise regulated by the commission as a natural gas pipeline utility or gas utility. For purposes of this paragraph, "customer" includes an affiliate of a customer. [PL 2011, c. 592, §1 (NEW).]

[PL 2011, c. 592, §1 (RPR).]

2. Safety regulation. The commission may exercise safety regulation over an entity that owns or operates a private natural gas pipeline on public land or land owned by a 3rd party, notwithstanding that the entity is not a public utility. The commission may exercise safety regulation over the owner or operator of an affiliated compression or liquefaction facility, notwithstanding that the owner or operator is not a public utility. Safety regulation under this subsection may be enforced as provided in sections 4515 and 4516-A.

[PL 2011, c. 592, §2 (AMD).]

3. Approval of construction. A private natural gas pipeline or affiliated compression or liquefaction facility may not be constructed without approval of the commission. When requesting approval, the entity that owns or operates a private natural gas pipeline or affiliated compression or liquefaction facility shall submit to the commission information concerning the engineering design of the pipeline or affiliated compression or liquefaction facility and the standards of construction the entity proposes to follow and any other information the commission determines necessary to make a determination of whether to approve construction. The commission shall approve the construction if the commission determines that the standards of construction of the pipeline or affiliated compression or liquefaction facility adequately protect the safety of the public.

[PL 2011, c. 592, §2 (AMD).]

4. Waiver. The commission may waive for good cause any requirements under this section.

[PL 2011, c. 110, §1 (NEW).]

5. Sale by affiliate of liquefied natural gas or compressed natural gas. The owner or operator of a private natural gas pipeline that delivers natural gas to its affiliate that then liquefies or compresses the natural gas for sale or distribution to others by means other than by a pipeline is not, as a result of the delivery, considered a public utility. The owner or operator of an affiliated compression or liquefaction facility is not considered a public utility if the owner or operator is not otherwise regulated by the commission as a public utility.
